MANUAL FOR CORRECT USE AND CLEANING OF PARTS, SURFACES, LAMINATES, METAL AND FABRICS

1. Laminate Surfaces: Recommended surface cleaning with a dampened microfiber-style cloth. Avoid by all means excessive wetting and seeping moisture into the joints. There are products such as cleaning oils to shine wood and laminate surfaces. It is NOT recommended, but if used, try not to wet it excessively and likewise avoid applying it near the joints.

2. Metal: The metals in this type of equipment is usually powder-coated and it can be cleaned with damp cloths. Does not require the use of chemical products and are in fact guaranteed against manufacturing defects in the event that they become discolored for any natural reason. One of our professionals takes care of the paint touch-ups. The chemicals used to clean could damage the paint, so the recommendation is that only superficial cleaning be done to remove the accumulated dust.

3. Fabric: The fabric is washable and flame resistant and it is recommended to clean it only with a damp microfiber cloth be used and allow to dry before reuse. In chemical products they are not recommended, but they can be used without affecting the material. There are liquid foams in "spray", make sure beforehand that the product is specifically for use in fabrics and vinyl products. If this is the case, when the fabric is used, it needs to dry before the upholstered equipment can be reused. Failure to do so could create wrinkles and/or marks on fabrics and/or vinyl products.

Textile Performance Offering

Guilford of Maine
Textile Performance Offering

We’re all about making life easier for you. With our wide range of performance offerings, you can get just what you need to make your project a success.

✓ Stain Repellent

Repellents are intended to prevent stains, dirt, and grime from penetrating the fabric. They create a protective shield that repels liquid, dirt and grime, thus giving you the time you need to clean the spills and prevent stains.

BLOCKaide™

- Our proprietary soil and stain repellent. It provides excellent repellency to oil and water and helps repel spills and makes clean up easier. Utilizes C6 chemistry.

✓ Crypton® Green

Crypton offers permanent stain, moisture, mildew, bacteria and odor-resistant protection by encapsulating each fiber while utilizing Green chemistry with ultra-low emissions. Crypton Green treated fabrics inhibit the growth of molds like Aspergillus niger and bacteria like Staphylococcus aureus. It also surpasses Greenguard’s Indoor Air Quality and complies with BIFMA X7 emissions requirements and contributes to points for LEED-CI.

✓ Acrylic Backcoating

Acrylic backing is a formaldehyde-free coating that stiffens and strengthens fabric, locking the weave alignment in place. Once coated, dissimilar fabrics have comparable degrees of stretch, recovery, and stability. Acrylic back coating also prevents bleed through of adhesives, camouflages fabric transparency, and minimizes “darts” that occur when some light reflectant fabrics are manually pulled onto a panel surface. It is available in 3 different weights.

Tyvek®

Tyvek is used on panels as an underlayment to add opacity and help prevent panel frames or other panel interior parts from showing through the fabric applied over it. It is a family of tough, durable spunbonded olefin sheet products. It is strong, lightweight, flexible, smooth, low-lingting, opaque and resistant to water, chemicals, abrasion and aging.

Guilford of Maine®
Fire Barrier

Fire Barrier is a knit product that can help furniture meet Cal-133 standards. The soft and flexible material is designed to char and swell when exposed to flame, creating an insulating barrier between the flame and the polyurethane foam in the seat. Laminating the barrier to the fabric extends the durability because it eliminates the friction that would occur between the fire barrier and the fabric if they were not adhered. Fire Barrier is available by the roll, laminated on our products, or on COM's. The three types of Fire Barrier are as follows:

F-117 (PBDE Free/Bromine Free)

- Fiberglass core coated with a modacrylic sheath. Modacrylic is a flame retardant fiber that forms a char when exposed to fire, while releasing a vapor-phase flame retardant. Vapor-phase flame retardants work by releasing gases that react with and interfere with the chemistry of flame.
- Excellent upholsteryability and breathability
- Performance is unaffected by water spills
- Free of Polybrominated diphenyl ethers (PBDE)
- Free of brominated flame retardants

2427 (PBDE Free/Halogen Free)

- Fiberglass core coated with a cotton sheath utilizing an intumescent flame retardant coating. The flame retardant actively helps put out the fire. Intumescent materials expand when subjected to fire, creating an insulating barrier that helps keep the flame from penetrating through the material.
- Excellent upholsteryability
- Greater protection than offered by F-117
- Performance is unaffected by water spills
- Free of Polybrominated diphenyl ethers (PBDE)
- Free of halogenated flame retardants

All subsequent deliveries must be made on or before sixty (60) calendar days after the date of the order resulting from the request. The Bidder will be responsible to maintain a detailed and updated tracker of the dispatched materials and products.

All deliveries shall be made in accordance with good commercial practice and all required delivery timeframes shall be adhered to by the bidder; except in cases where delivery will be delayed due to acts of Nature, strikes, or other causes beyond the control of the bidder. In these cases, the bidder shall notify the PRDOH of the delays in advance of the original delivery date so that a revised delivery schedule can be appropriately considered by the PRDOH.

Should the bidder to whom the contract is awarded fail to deliver in the number of days stated above, the PRDOH reserves the right to cancel the order on a default basis. If the order is so terminated, it is hereby understood and agreed that the PRDOH has the authority to purchase the goods elsewhere and to charge the incumbent bidder with any re-procurement costs. If the bidder fails to honor these re-procurement costs, the PRDOH may terminate the contract for default.

Certain PRDOH employees may be authorized in writing to pick-up materials under this contract. Bidders shall require the presentation of this written authorization. The bidder shall maintain a copy of the authorization. If the bidder is in doubt about any aspect of material pick-up, the bidder shall contact the appropriate PRDOH point of contact to confirm the authorization.

Orders requiring special handling such as air freight, next day delivery, etc., may only be approved and placed with written authorization by the PRDOH. In those cases, the price quoted by the bides shall be inclusive of any additional shipping costs.

Back orders should be confirmed at the time of the order confirmation with an estimated delivery date, PRDOH will have an option to cancel or keep the back orders.

5. Pricing

Should any price change be needed, such price change must be requested in writing and must be accompanied by appropriately documented market justification. All price changes will be granted only with written approval from the PRDOH.

After contract award, a bidder may offer, either on its own initiative or at the PRDOH’s request, additional discounts, customized lists, or discounted prices for any purchase
within the scope of the contract, even if such discounts were not included in the bid prices.

If an "equal" item may be considered by the PRDOH in accordance with Exhibit O (Cost Form), the proposed item shall be equal in quality to the item specified in the solicitation. Where an "equal" item is offered, and product information sheets are required, the initial offer must be accompanied with two (2) complete sets of product information sheets (such as factory specifications, standard manufacturer information, sheets, catalogs, and brochures). Also, for product information submitted, all supporting documentation submitted by the bidder must in total meet the required specifications set forth in this solicitation. Where the standard product literature submitted with the offer provides information that does not comply with the specifications, the bidder shall state, in an official letter on corporate letterhead as part of their initial offer, the differences between the item they are specifically offering, and the equipment described by the standard product literature, to substantiate compliance to all of the specifications set forth in this solicitation. In such cases, any offer submitted with standard product literature but without the letter, explaining compliance may result in the rejection of the offer for not meeting the solicitation specifications. Materials shall be new and warranted against defects.

All materials, except where recycled content is specifically requested, supplied by the bidder in conjunction with this solicitation and resultant contract shall be new, warranted for their merchantability, and fit for a particular purpose. In the event any of the materials supplied to the PRDOH by the bidder are found to be defective or do not conform to specifications: (1) the materials may be returned to the bidder at the bidder’s expense or (2) the PRDOH may require the bidder to replace the materials at the bidder’s expense.

The PRDOH reserves the right to request the removal of any staff not performing to standard. No personnel may be assigned to the resulting contract without the written consent of the PRDOH.

7. Warranty
Full warranty on parts and accessories shall be defined as the manufacturer’s standard limited warranty and shall otherwise be equal to or exceed that offered to the general public. All warranties shall become effective on the date the items are accepted by PRDOH. All defective items must be replaced within five (5) days at no additional cost to PRDOH.
8. Documentation

Programs that receive Federal funds cannot distinguish among individuals on the basis of race, color or national origin, either directly or indirectly, in the types, quantity, quality or timelines of program services, aids or benefits that they provide or the manner in which they provide them. This prohibition applies to intentional discrimination as well as to procedures, criteria or methods of administration that appear neutral but have a discriminatory effect on individuals because of their race, color, or national origin. Policies and practices that have such an effect must be eliminated unless a recipient can show that they were necessary to achieve a legitimate nondiscriminatory objective.

10. SECTION 109 OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

The CONTRACTOR shall comply with the provisions of Section 109 of the Housing and Community Development Act of 1974. The CONTRACTOR represents to the PRDOH that all work shall be performed by personnel experienced in the appropriate and applicable profession and areas of expertise, taking into account the nature of the work to be performed under this Contract.
